Subject: Microwave Connectors

Dear Valued Customer:

BJG Electronics, Inc. is pleased to announce that it has acquired W.L. Gore's microwave connector stand-alone, push-on connector business. BJG specializes in the value-added distribution of mil-aero, industrial, and harsh environment connectors, connector accessories, and electromechanical interconnect products. The addition of this product line strengthens our microwave offering to our mil-aero, telecom and industrial customers.

BJG will assume responsibility for all orders for these products beginning August 1, 2011. Stand-alone connectors can be ordered from Gore until July 31. During the transition period between now and July 31, Gore and BJG will work together to fill customer requests. At the end of the transition, any open orders will be transferred to BJG.

Starting August 1, please direct all inquiries for stand-alone, push-on microwave connector products to BJG. The BJG point of contact will be Joe Flora at 800.847.7127.

Until then please feel free to contact me directly with any questions you may have concerning this matter. We appreciate the opportunity to work with your organization during this transition period.

Best Regards,
BJG Electronics, Inc.

Joseph Flora
Director of Sales and Marketing
