

MEMORANDUM

Date: March 23, 2020
To: Distribution
From: Eric Rushbrook 
Subject: Amphenol India Bangalore Operations Closure

This morning, we received official confirmation that our Indian manufacturing operations in Bangalore will be closed from 23-March 2020 through 01-April 2020.

This is the result of a mandate from the local India Government to attempt to contain the COVID-19 outbreak in the Bangalore district of India. "intercity and interstate traffic will be stopped, including freight transportation".

We attempted to appeal to the Indian Government based on the type of industries we are serving, but there was no possibility of an exemption.

They will have staff working from home in a non-manufacturing capacity who will be supporting product engineering, customer service and sales operations.

Product lines produced at this location are as follows: M85049, MS25042, and MS25043.

We will be working with them to understand the potential impact to your current backlog and any changes to the delivery schedules which will be required.
