

## Covid-19 – Impact on Draka Fileca’s activities

Sainte-Geneviève, March 20<sup>th</sup>, 2020

Dear Customer and Partner,

Draka Fileca plant is located in France (Sainte-Geneviève; 60) in Oise region, one of the main clusters for Covid-19 and unfortunate region of the first lethal case.

Prysmian Group and Draka Fileca are strongly involved to do everything possible to protect the health of our employees, to limit the spread of the Covid-19 and to support our Customers activities.

As a result, Draka Fileca has deployed since the beginning of this week, exceptional measures to ensure Business continuity.

However, as we faced this week a sudden and significant increase in the number of suspicious cases, we made the decision to close immediately the plant to protect our people.

Operations will be completely closed for all week 13 and are expected to resume normally on the morning of March 30<sup>th</sup>, 2020. This will provide enough time to disinfect completely the plant, review and improve measures of safety.

As there will be no shipment next week from our French plant, we have started (and will carry on this end of week 12) shipping in advance all the cables. Our Operations in Mexico will continue to support our Customers in the limit of Cables scope qualified over there.

Sales force in France and in US and Operations planification will be sized to this shut-down period and will remain reachable to support you.

We are very sorry for the inconvenience and we will keep you informed of any change.

Best regards,

Philippe Flament  
Aerospace Director
