

To: Customers and Partners

Date: April 2, 2020

Subject: Coronavirus (COVID-19) update

As of April 2, 2020, the Amphenol Aerospace facility in Nogales, MX remains operational but, on a limited basis. We have worked diligently at a local level to ensure both the safety of our employees and a continuous, even if limited, supply of product for our customers. Concurrently, our Nogales, AZ warehouse remains open as it is considered an essential business by the State of Arizona.

In addition, Amphenol Aerospace has also taken the following actions:

- Moved finished goods inventory to our Nogales, AZ warehouse.
- Moved subassembly and component Kanban inventories to our Nogales, AZ warehouse.
- Working with our distribution network to understand their availability of assembled connectors and connector component levels.
- Continuing production in Sidney, NY, and through our large network of vendors.

In light of our reduced Nogales, MX production levels we do anticipate that some deliveries to you will likely be delayed by approximately three weeks. We will continue to advise you if and when our status changes.

We are confident that by working together, we will manage through this challenging time. The health of our customers, suppliers, employees and their families remains as our top priority. Thank you for your continued confidence in and partnership with Amphenol Aerospace. Please refer to the [Amphenol Aerospace](#) website for the most up-to-date information on Amphenol Aerospace's Coronavirus (COVID-19) status.

Regards,

**Amphenol Aerospace**
